

The ANDLab Forum ANDLab is an international event which will be open public conferences and professional seminars, by some of the world's best in their field. A unique opportunity for debate and training, to establish the basis of a new working methodology. Harnessing the knowledge and results gained during centuries, as well as the latest research, to adapt us to the current and future needs of the people.

Medicine doctors, chiropractors, osteopaths, psychologists, philosophers, athletes, nutritionists, and other related figures, coming from Andorra, Spain, France, Italy, Germany and Austria joined for the first time with the aim of:

- Approach the people to a new way of health understanding, from self-awareness, prevention, education, individuality respect and new form of teamwork.
- Serving the healthcare professionals a new way for understanding the profession in teamwork, to improve people's health in a preventive approach, conservative and non-agresive, highly effective and sustainable in both economic and social. This avant-garde vision of health should be seen as an opportunity for personal and professional growth, as well as a challenge and necessary adaptation.

" The best way to predict the future is create it "
(Abraham Lincoln)

" If you change the way you see the things, the things you look will change "
(PhD. Dr. Wayner Dyer D.C.)

" The scientific achievements on health are useful only if they are accessible to people "
(Dr. Ramón Carrillo)
